

Propane Pull-Out Accessory

[PROPANE TANK NOT INCLUDED WITH ACCESSORY.]

Tools

To assemble this product you will require:

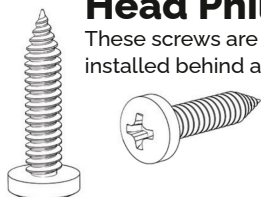

Equipment

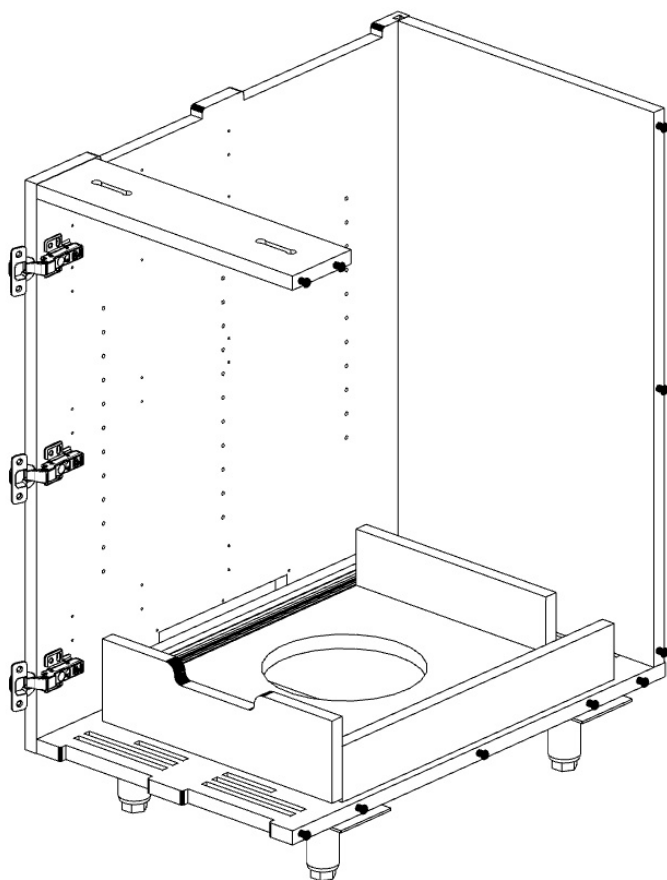

To assemble this product you should have:

#8 x 1-1/4" Stainless Steel Pan Head Phillips Screw

These screws are utilized as rails stops. This screw is installed behind all top rails and drawer/door rails.

Qty: 4

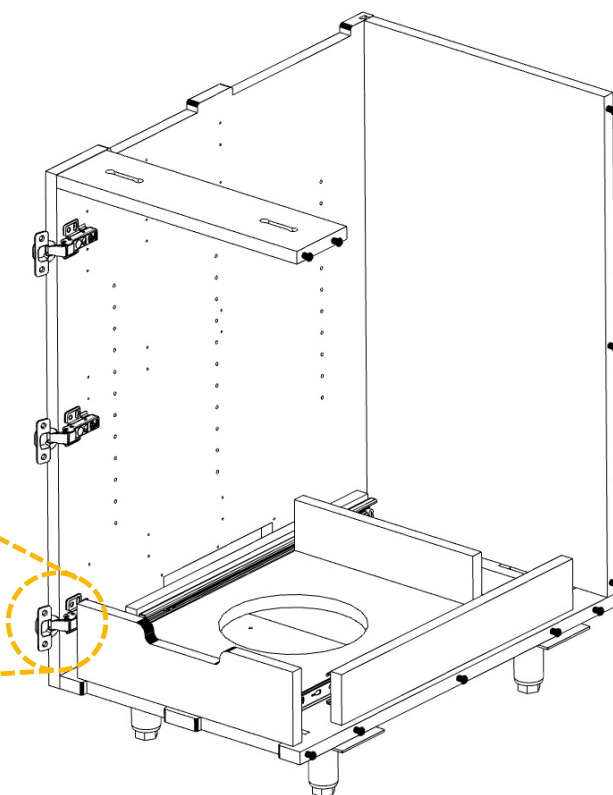

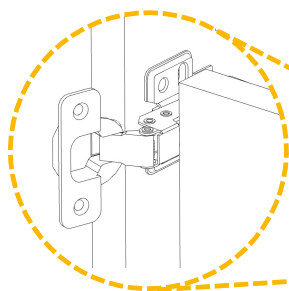

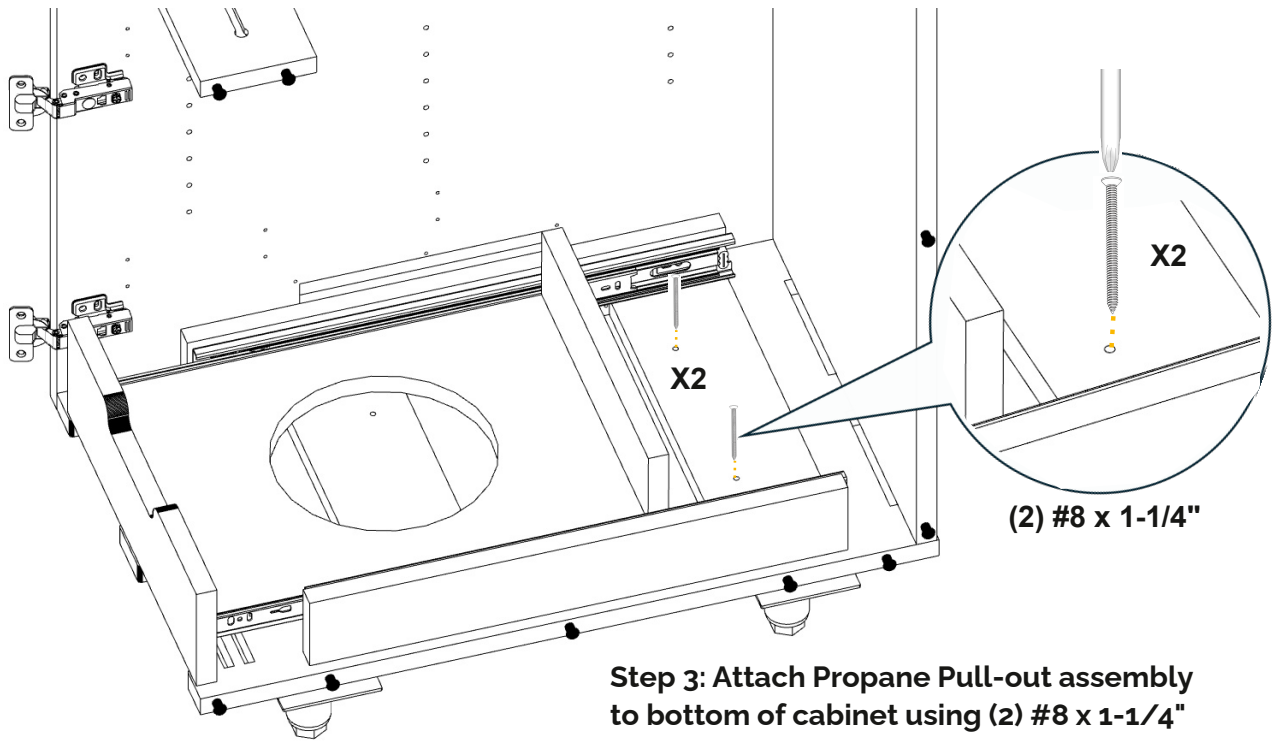

Step 1: Position Propane Pullout accessory on cabinet bottom shelf behind ventilation slots. **Caution: Do not cover or block the ventilation slots!**

Cabinet Door and Side panel have been removed for illustration clarity.

Step 2: Make sure the Drawer Face clears hinge assembly when the drawer is fully extended.

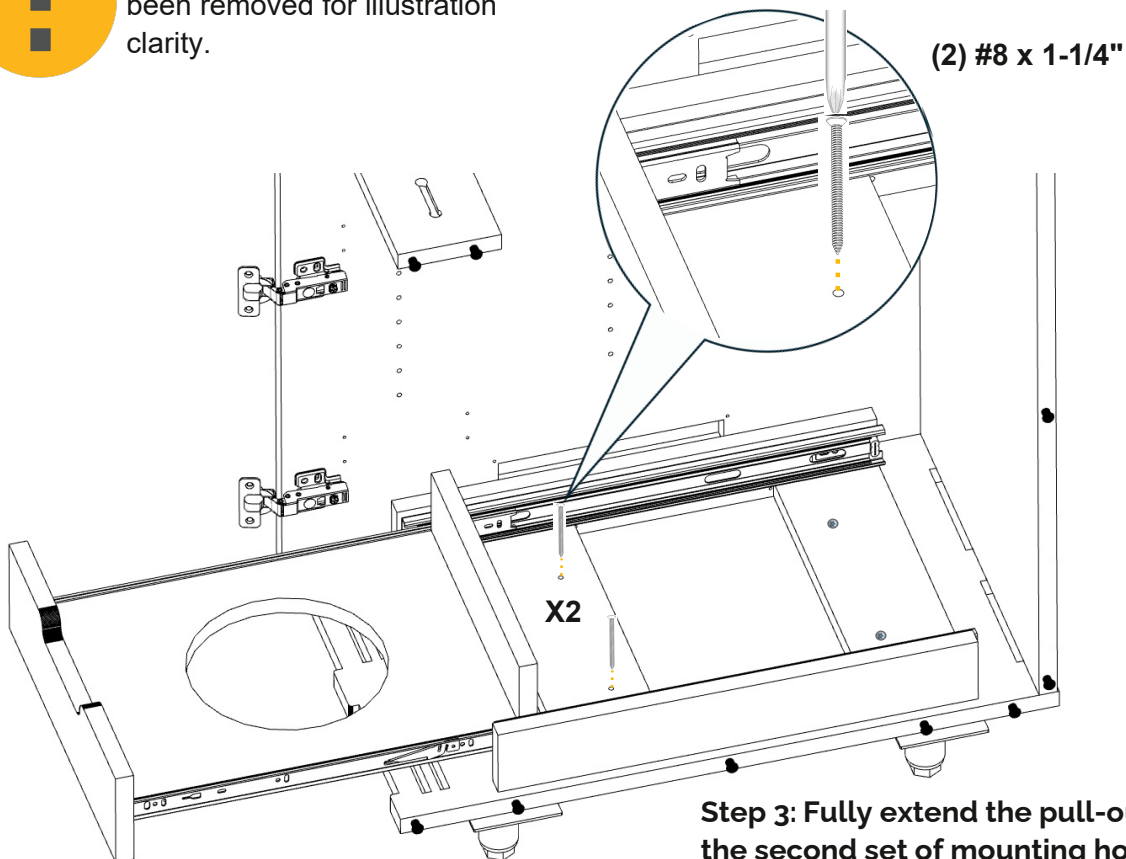

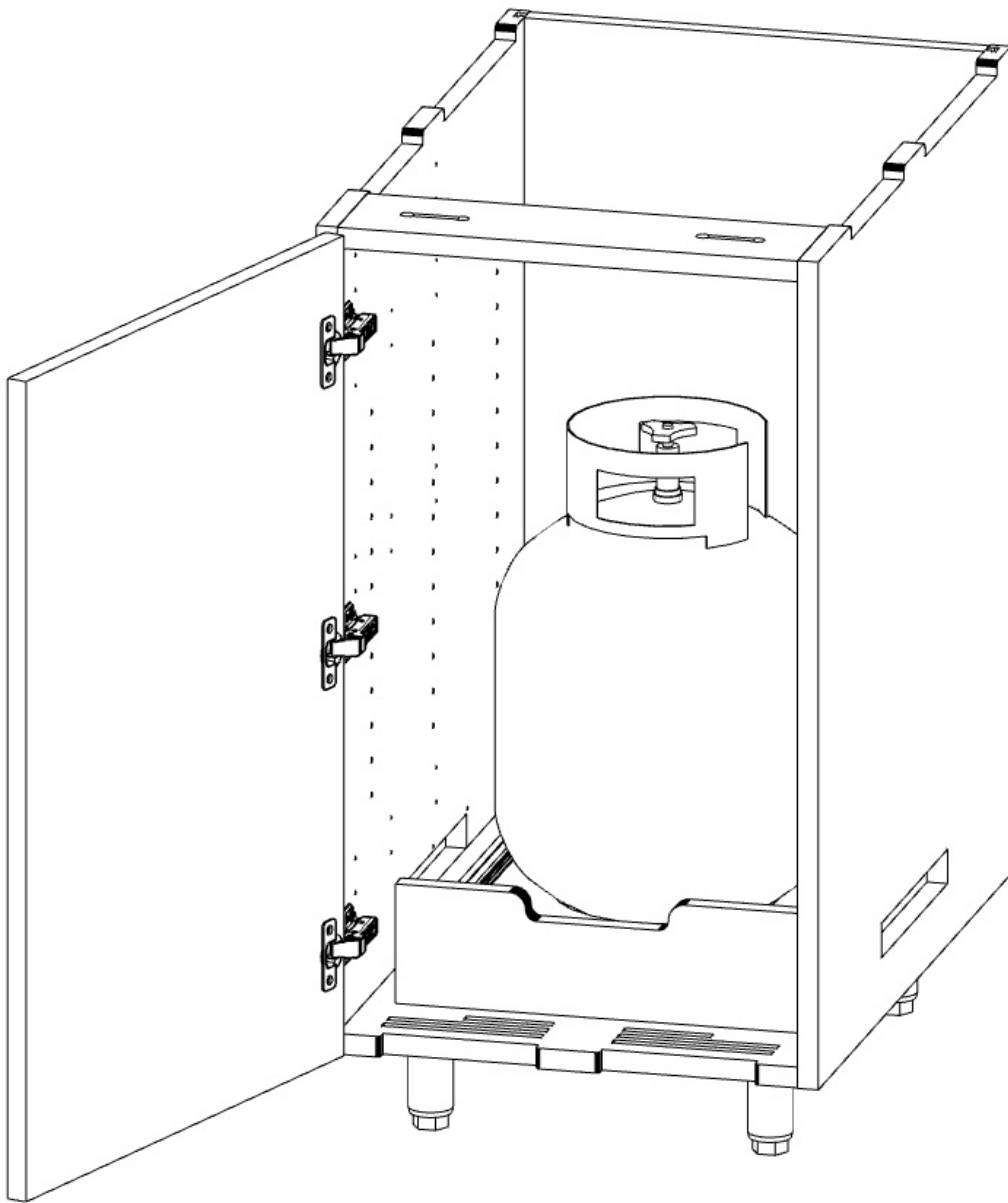

Step 3: Attach Propane Pull-out assembly to bottom of cabinet using (2) #8 x 1-1/4" screws.

Cabinet Door and Side panel have been removed for illustration clarity.

Step 3: Fully extend the pull-out to reveal the second set of mounting holes. Secure using (2) #8 x 1-1/4" screws.
